

Vendor Experience Overview

This article provides an overview of the vendor experience when accessing the application. Vendors have access to various sections such as responses, awards, and project information. The article highlights the dashboard view for responses and the ability to filter between contracts and projects. Vendors can also view their awards and manage their responses and status within the application.

Responses contains all responses the vendor has started, in a dashboard view. Note the quick filters off to the left.

When a vendor clicks in to their response, they can see their response details and status, as well as the project information (on the right tab).

By clicking into one of their awarded contracts, vendors can see the contract details. It's similar with projects.

CONTRACT DOCUMENTS

No Documents Included

Vendors often need to upload documents as part of their contracts, such as copies of their insurance. They can do that through the document upload, and then government employees can approve or reject those documents.
